PROFILE SUMMARY

DevOps Engineer with around 3 years of hands-on experience in AWS Cloud, CI/CD pipeline automation, and Infrastructure as Code (IaC). Skilled in streamlining build and deployment processes using Jenkins, Docker, and Kubernetes. Experienced in automating infrastructure provisioning with Terraform and Ansible, ensuring efficient, secure, and reliable cloud environments. Seeking to contribute expertise to a dynamic and growth-oriented organization.

TECHNICAL SKILLS

- **CI/CD Tools** : Jenkins, AWS CodePipeline
- **Version Control Systems** : Git, GitHub
- **Containerization & Orchestration** - Docker, Kubernetes
- **Infrastructure as Code (IaC)** - Terraform, AWS CloudFormation
- **Configuration Management** - Ansible
- **Cloud Platforms** : AWS (EC2, S3, RDS, VPC, IAM, ELB, Auto Scaling, ECS, ECR, Route 53)
- **Monitoring & Observability**: Prometheus, Grafana, AWS CloudWatch
- **Build Tools**: Maven
- **Operating Systems** : Linux (Ubuntu)
- **Scripting Language**: Python, Bash
- **Security & Quality**: Trivy, SonarQube, OWASP

EXPERIENCE

DevOps Engineer (Sr Analyst)

Capgemini Technology Services India Limited,

Bangalore Project: HP | Aug 2023 - Present)

Responsibilities:

- Designed and maintained CI/CD pipelines using Jenkins and AWS CodePipeline to support automated build and deployment across development, staging, and production environments.
- Managed and optimized AWS infrastructure (EC2, S3, RDS, VPC, IAM), ensuring high availability, scalability, and secure configurations.
- Automated infrastructure provisioning using Terraform and CloudFormation, improving deployment consistency and reducing manual effort.
- Implemented configuration management using Ansible to maintain environment consistency across multiple environments.

- Containerized applications using Docker and deployed them on Kubernetes (Pods, Deployments, Services, Ingress, PV/PVC) for scalable and reliable operations.
- Monitored system performance and availability using Prometheus, Grafana, and AWS CloudWatch, enabling proactive issue detection and resolution.
- Troubleshoot deployment and performance issues in distributed systems, improving system stability and uptime.

Analyst/Software Engineer

Capgemini Technology Services India Limited, Bengaluru

Project: **Darden** | Oct 2022 - July 2023

- Designed and implemented automation tools and scripts for CI/CD pipelines, reducing deployment effort and improving consistency.
- Compiled and built source code using Maven; executed unit test cases to ensure functionality.
- Integrated SonarQube and OWASP to assess code quality, coverage, and detect vulnerabilities.
- Deployed build artifacts into Nexus Repository for centralized version management.
- Created and optimized Dockerfiles for image builds; scanned images using Trivy and published to Docker Hub.

EDUCATION

- B. Tech in Computer Science & Engineering | BNM Institute of Technology, Bangalore | 8.2 CGPA | 2022
- PUC in PCMB | Sri Vijetha PU College, Chintamani | 91% | 2018
- SSLC | Bharatha Ratna Educational Trust, Chintamani | 90% | 2016

CERTIFICATIONS

1. AWS Cloud Practitioner
2. AWS Associate Solution Architect
